

An overhead view of a business meeting with several people in business attire sitting around a table. They are looking at documents, a laptop, and a tablet. The image is overlaid with a purple gradient.

# SUPPLIER QUALITY ENGINEER

*St Gallen Region,  
Switzerland*

✉ **TAMANNA@ELEMED.EU**

## THE COMPANY

This role is with a company that is a market leader in the field of high-risk cardiovascular products, providing you with a great opportunity to work on an innovative product pipeline. The company has a fantastic global presence, allowing you to develop your career internationally.

They are a medium-sized company where the quality department that you will be joining is 4 strong. A close-knit team where people share ideas and support each other's career growth.

Find out more about this great opportunity on the next page!

## THE OPPORTUNITY

As the Supplier Quality Engineer you will gain the opportunity to work alongside different departments and develop your career within quality assurance.

A great opportunity to work within the operational and supplier side of quality, being a global partner to this company's supplier network. You will be joining a globally established company that has a great product portfolio.

## THE RESPONSIBILITIES

**As the supplier quality engineer, your responsibilities will include but not be limited to:**

- Working in partnership with the global supplier network and addressing key supplier issues
- Working closely with management and other departments to ensure quality standards are met
- Together with a close-knit team, you will ensure that suppliers meet the businesses expectations from a quality and cost perspective
- You will be a key liaison between the quality and regulatory teams, ensuring that timelines are met
- Collaborate strategically with the Head of QA/QC to ensure the supply network is running successfully and providing key strategy where required
- Handle and develop CAPA-related tasks

## YOUR QUALIFICATIONS

You will be a great fit for this role if you have the following:

- 3+ years of experience in supplier quality for medical devices
- You have a bachelor's degree in either engineering or a scientific discipline
- You are familiar with international regulatory standards, according to ISO 13485
- Good experience with lean tools and handling a supplier network
- Excellent communication skills in English and German
