

ST GALLEN REGION,
SWITZERLAND

Manufacturing Engineer

JOHN@ELEMED.EU

eleMed

The company

This role is with a company that is a market leader in the field of high-risk cardiovascular products, providing you with a great opportunity to work on an innovative product pipeline.

The company has a fantastic global presence, allowing you to develop your career internationally. The manufacturing site is based in the St Gallen region, where you are based within the heart of production and manufacturing of a Class III product.

The quality and R&D teams sit in the same location, allowing for close collaboration between all departments.

The role

As the Manufacturing Engineer, you will gain the opportunity to work alongside different departments and develop your career within manufacturing and quality. This is a great opportunity to work within the operational side of quality and manufacturing. You will be joining a globally established company that has a great product portfolio.

As the Manufacturing Engineer your responsibilities will include but not be limited to:

- Develop key documentation for end of production lines and assembly lines
- Play a role in identifying key continuous improvement plans
- Be a technical advisor to both the R&D and QA teams
- Continuous improvement of the production line on both existing and new product lines
- Be part of test validation methods for Class III products

Qualifications

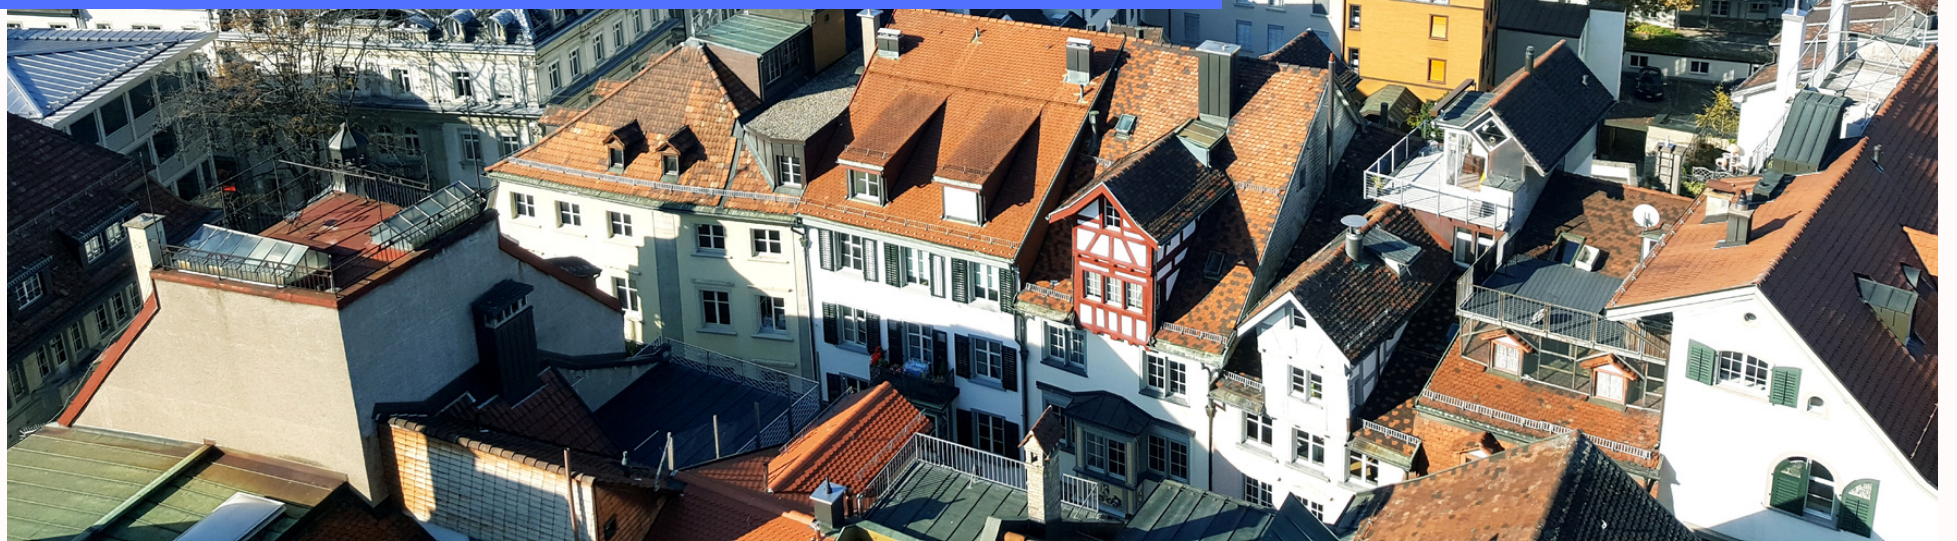

You will be a great fit for this role if you have the following:

- 3+ years of experience in manufacturing for medical devices
- You have a bachelor's degree in either engineering or a scientific discipline
- You are familiar with international regulatory standards, according to ISO 13485
- You have worked with test validation methods before
- Excellent communication skills in English and German

If you are looking for your next career step and for an opportunity to learn and develop globally, ensure you apply today to find out more about this unique opportunity.
